- Purchasing/Receiving/Quality/Work Order
- Receiving/Inspection/Quality
- Sales/Prospecting/Lead Tracking/Marketing
- Scheduling
- Linking to Excel/MAS90/MySQL/SQL DBs

## APPLICATION SOLUTIONS THAT WORK FOR YOUR EMPLOYEES

Whether you want to improve the productivity of your employees, increase the efficiency of your employees, or have them perform processes that are almost impossible to do manually, CAS custom application solutions are the way to go.

Most of your employee dollar goes towards salaries for information processing!! By automating your company's information processing, you will save money and/or lower fixed costs. Your employees will be more productive by doing more in the same amount of time OR performing the same tasks in a much shorter time.

Don't confuse BUSY with PRODUCTIVE!! Your employees are "busy" doing work. Make them more "productive" and "efficient" by having them not be high-paid data processors. Let them do more of the work you pay them to do.

### ABOUT CAS

- \* Developing applications since 1983
- \* MS Access Developer since 1992
- \* More cost-effective than using an employee or another development company
- \* Well-versed in a variety of business areas, departments within companies, and processes in those departments.
- \* Very good at "interviewing" your employees on what it is they would like developed
- \* Involve affected employees in the development process
- \* Use industry-standard development design techniques
- \* Not only develop applications using MS Access, but also have trained companies in its use as well as written manuals and run user groups
